

EcoFleet

Efficient. Clean. Reliable.

Why Vega, Karlsruhe and the world *need* Eco Fleet.

Eco Fleet is a waste management tool designed to keep cities clean. It efficiently monitors a city's waste with Vega sensors and solves the problem of overfilled waste containers in two ways:

Users

Waste Container

Container accepting: Glass, Aluminum, General Waste

Max Fill Level 73%

Glass 73%

Aluminum 22%

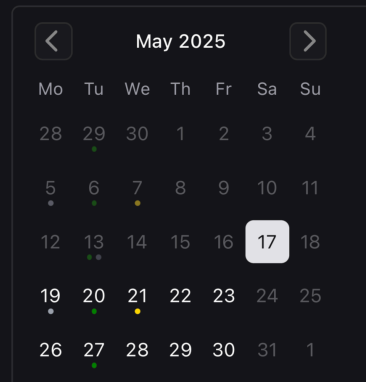

General Waste 25%

Show Calendar

Schedule Pickup

Select a date for container pickup

Selected: 5/17/2025

No trash service on this day

Giving citizens the live information they need about waste containers, recycling and trash collection dates

Recycling Guide

How to recycle different materials

Click on any item for detailed guidelines

Glass Rinse and separate by color

Aluminum Rinse, remove labels

Paper Keep dry, bundle together

Plastic Check recycling number

Batteries Special collection points

Never dispose of batteries in regular trash. Household batteries can be taken to designated collection points. Rechargeable and lithium-ion batteries should be taken to electronic retailers or hazardous waste facilities.

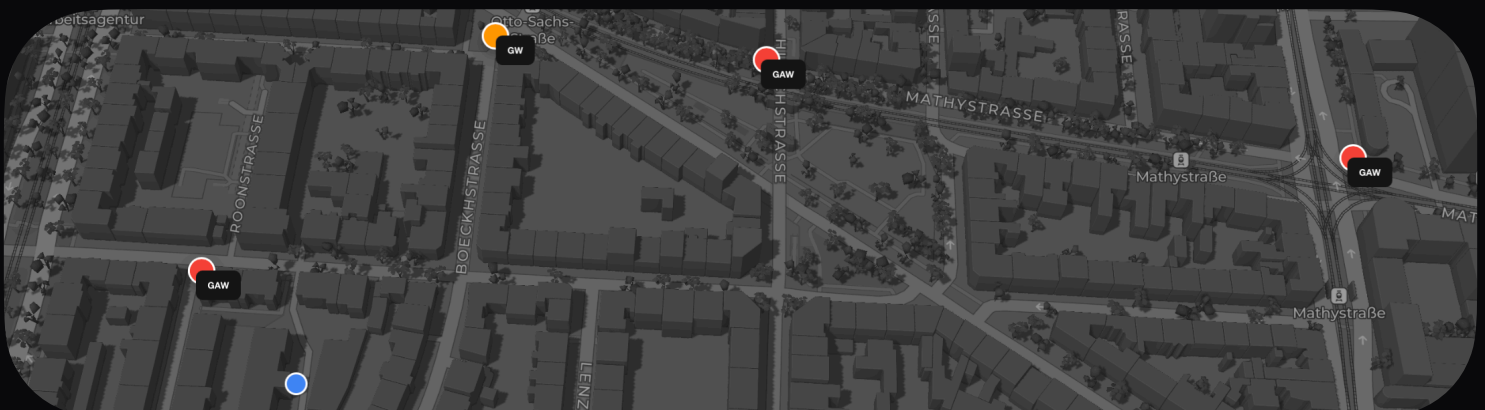

Local Drop-off Locations Südweststadt:

- Bahnhofstraße gegenüber Nr. 42
- Beiertheimer Allee 2 (vor Landratsamt)
- Ernst-Frey-Straße/Steinhäuserstraße

Cities

Providing the city with
optimal collection routing,
live waste statistics and
long term waste
management planning
insights

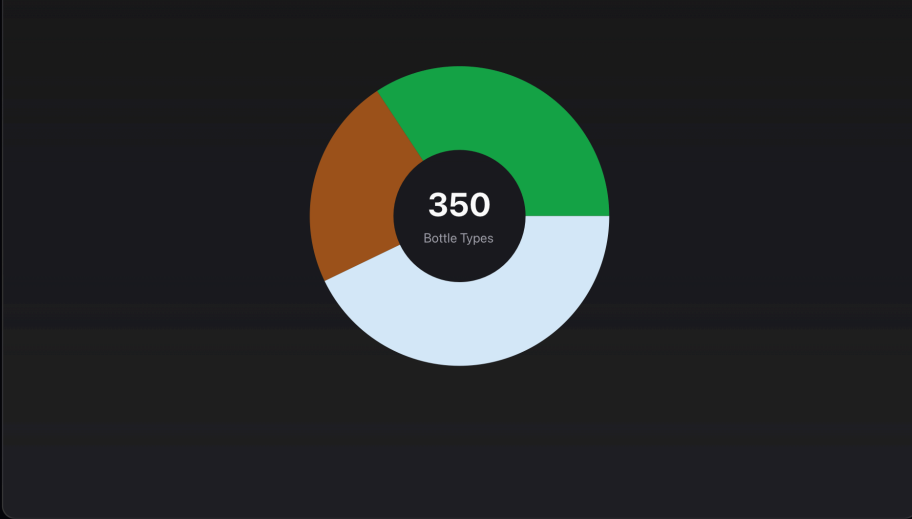

Bottle distribution

January - April 2025

A donut chart illustrating the distribution of bottle types. The chart is divided into three segments: a green segment (top right), a light blue segment (bottom), and an orange segment (top left). A central black circle contains the text '350' and 'Bottle Types'.

Bottle Type	Count
Green	150
Light Blue	120
Orange	80
Total	350

The logo for EcoFleet is a square with rounded corners. It has a black background. The word "Eco" is in white, and "Fleet" is in a blue-to-green gradient. The entire logo is enclosed in a blue-to-green gradient border.

Implemented features of **Eco Fleet.**

Users

Live fill level of all containers in the city

Recycling information & education

Collection calendar based on user's location

Cities

Optimal route planning for container collection

Live data of containers over time

Long-term strategic development roadmap
